

Comparison of Arteriogenic and Angiogenic Shear-Induced Regulation in Conduit Vessel and Microvascular Endothelial Cells

- In each cell line there are 3 groups:
1. Precondition then 0.14 dyne/cm² (2.5cc/min) then 6 hours 0.14
 2. Precondition then 10 dyne/cm² for 6hours
 3. Precondition then 65 dyne/cm² for 6hours
